Outcomes

- Does the patient have a Christie consultant?
- Responsible consultant
- NHS or private
- Images specified
- Pathology requested
- Reason for MDT request
- Reason for review
- Date of surgery
- Date of radiotherapy completion
- Previous SACT regimens
- ACE comorbidities
- Further comorbidities and past medical history
- Does the patient have a key worker?
- Key worker name
- Previously recorded histology
- Previously recorded clinical stage
- Previously recorded path stage
- MDT clinical details
- Form type
- MDT review
- Date of MDT
- Radiology review
- Radiology findings
- Date of progression
- Histology comments
- Histology
- Differentiation
- LVSI
- MDT management
- MDT outcome (cervix-vagina)
- Planned surgical treatment for this cancer
- Treatment intent
- Further investigations or review required
- Patient impact assessment detail
- MDT outcome comments
- Actions
- Is there an appropriate trial for this patient?
- Trial name
- Referrals required to
- Named central surgeon
- Named clinical oncologist
- Immediate actions to be completed by
- The MDT decision is now complete
- Further details of actions needed

- Clinical frailty scale
- Clinal
- Performance Status
- Previous surgical procedure for this cancer
- Previous treatment for this cancer
- Primary disease site (gynaecology)

- About me
- Lasting PoA
- Communication

- Reviews required
- Has a new biopsy been taken for this pathology review?
